

Zoo Pathologist Position

ZooParc de Beauval is looking for a Zoo pathologist. This position, to be constructed, would include, without being restricted to :

- Cytology, necropsy and histopathology on the zoo collection and the Beauval Wildlife Care Center
- Research projects
- Histopathology on domestic animals.

ZooParc de Beauval has the largest and most diverse animal collection in France (more than 20 000 animals and more than 700 species). The new 1400m² veterinary hospital was built in 2016 and includes an 80m² laboratory (incl. biochemistry, hematology, electrophoresis, hormonology, etc.), hospitalization areas, quarantines, necropsy room, treatment and surgery rooms, on-site CT-scan, digital radiology, ultrasonography and endoscopy.

The new veterinarian will work with the veterinary staff (5 veterinarians, 1 ECZM resident, 1 intern, 4 vet nurses and 2 researchers), veterinary trainees, animal keepers and curatorial staff.

Applications and requests for additional information should be directed to Baptiste Mulot, ZooParc de Beauval, 41110 Saint-Aignan, France, baptiste.mulot@zoob Beauval.com. The project will be constructed with the selected applicant. Candidate needs to speak French and/or English fluently.

A response will be given to all applying candidates.
