

MyLav is a private veterinary diagnostic laboratory located in Milan (Italy) and was established for over 20 years. The lab offers a full range of infectious disease, genetic and pathology testing to general practitioners and specialist referral centres throughout Italy and Europe. The Section of Veterinary Anatomic Pathology provides comprehensive diagnostic services including biopsy evaluation, diagnostic immunohistochemistry and immunofluorescence, and transmission electron microscopy.

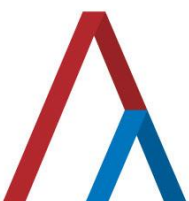

We are seeking a qualified (DipACVP or DipECVP) a French or French speaking veterinary anatomic pathologist in small animal/companion animal pathology to join our team. The responsibilities include interpretation of histopathology samples, as well as integration of results from other disciplines (immunohistochemistry, immunofluorescence, ultrastructural examination, and PCR) thereby providing clients with a complete diagnostic service. You will join a team of 10 experienced, enthusiastic, and welcoming pathologists.

We are very much focused on quality work and service and have a varied caseload. Interaction with clinicians is also part of the job so this requires someone autonomous, adaptable, organized, results and deadline oriented and a friendly disposition.

Fluent French, Good Knowledge English. Italian language not required.

If you are interested in this position, please email Dr. Ugo Bonfanti at [ugobonfanti@laboratoriolavallonea.it](mailto:ugobonfanti@laboratoriolavallonea.it) (contact no: +39 02 931 1172) detailing your experience and attaching a copy of your curriculum vitae. Salary will be commensurate with your experience and caseload.

Closing date of the Announcement: End of September 2023
